Programa ejecutándose

The image displays two screenshots of an IDE (Android Studio) showing the execution of a Flutter application. The top screenshot shows the `main.dart` file with the `MyApp` class and its `build` method. The bottom screenshot shows the `_PreferencesScreenState` class and its `build` method. Both screenshots show the debug console with Android log output.

Top Screenshot: `main.dart`

```
lib > main.dart > MyApp > build
1 import 'package:flutter/material.dart';
2
3 void main() {
4   runApp(MyApp());
5 }
6
7 class MyApp extends StatelessWidget {
8   @override
9   Widget build(BuildContext context) {
10    return MaterialApp(
11      debugShowCheckedModeBanner: true,
12      title: 'Registro de Preferencias',
13      theme: ThemeData(
14        primarySwatch: Colors.blue,
15      ), // ThemeData
16      home: PreferencesScreen(),
17    ); // MaterialApp
18  }
19 }
20
21 class PreferencesScreen extends StatefulWidget {
22   @override
23   _PreferencesScreenState createState() => _PreferencesScreenState();
24 }
25
26 class _PreferencesScreenState extends State<PreferencesScreen> {
27   String genero = 'Masculino';
28 }
```

Bottom Screenshot: `_PreferencesScreenState`

```
26 class _PreferencesScreenState extends State<PreferencesScreen> {
38   Widget build(BuildContext context) {
125     Card(
126       color: Colors.orange.shade50,
127       shape: RoundedRectangleBorder(
128         borderRadius: BorderRadius.circular(12),
129         side: BorderSide(color: Colors.orange.shade200),
130       ), // RoundedRectangleBorder
131       child: Padding(
132         padding: EdgeInsets.all(12.0),
133         child: Column(
134           crossAxisAlignment: CrossAxisAlignment.start,
135           children: [
136             Row(
137               children: [
138                 Icon(Icons.view_list, color: Colors.orange.shade800),
139                 SizedBox(width: 8),
140                 Text(
141                   'Seccion 3: Distribucion en Filas',
142                   style: TextStyle(fontSize: 16, fontWeight: FontWeight.bold, color: Colors.orange.shade800),
143                 ), // Text
144               ],
145             ), // Row
146             SizedBox(height: 10),
147             Container(
148               padding: EdgeInsets.symmetric(horizontal: 12, vertical: 8),
149               decoration: BoxDecoration(
150                 color: Colors.red.shade100,
151                 borderRadius: BorderRadius.circular(8),
152               ),
153             ),
154           ],
155         ),
156       ),
157     ),
158   ),
159 }
```

Debug Console Output:

```
D/WindowOnBackDispatcher(14838): setOnBackPressedCallback (unwrapped): io.flutter.embedding.android.FlutterActivity$1@50f5f5c
D/WindowOnBackDispatcher(14838): setOnBackPressedCallbackInfo: io.flutter.embedding.android.FlutterActivity$1@50f5f5c
D/WindowOnBackDispatcher(14838): setOnBackPressedCallback (unwrapped): android.app.Activity$ExternalSyntheticLambda0@af08807
D/WindowOnBackDispatcher(14838): setOnBackPressedCallbackInfo: android.app.Activity$ExternalSyntheticLambda0@af08807
```
